## SUMMARY

---

Results-driven Front-End Developer with over 3 years of experience in building responsive and visually appealing web applications. Proficient in a wide range of front-end technologies including HTML5, CSS3, JavaScript, and popular frameworks such as React. Demonstrated expertise in creating intuitive user interfaces, optimizing web performance, and ensuring cross-browser compatibility. Adept at collaborating with UX/UI designers and back-end developers to deliver seamless and user-centric digital solutions. Passionate about staying current with industry trends and best practices to continually enhance the user experience.

## TECHNICAL SKILLS

---

**Front-End:** HTML, CSS, JavaScript (ES6), React.js, React Hooks, Redux Toolkit, Formik, Bootstrap, Tailwind CSS, Sass/SCSS, Styled Components, React Router, Typescript

**Back-End:** Node.js, Express.js, MongoDB, SQL

**Others:** Git, GitHub, Visual Studio Code, Figma, Postman

## EXPERIENCE

---

### Front-end Developer

**Ipsium Philippines | June 2021 – January 2023**

- Developed SEO-friendly, responsive websites using HTML, CSS, SCSS, and Laravel Blade.
- Implemented BEM methodology to maintain scalable and maintainable CSS architecture.
- Utilized JavaScript, jQuery to enhance interactivity and user experience.
- Designed and customized websites on WordPress and BigCommerce platforms.
- Collaborated with design teams using Figma to translate designs into functional web experiences.
- Updated websites with new content, features, and plugins to enhance functionality.
- Improved website performance, optimizing load times and user experience.
- Identified and resolved website issues, such as broken links and server errors.
- Assisted in the development of technical solutions to improve website functionality.
- Ensured mobile responsiveness and mobile-friendly features for smartphone users.
- Created and maintained development documentation for efficient website updates.
- Optimized web pages for speed and scalability to improve SEO and user experience.
- Provided recommendations for enhancing e-commerce websites, focusing on design and user experience improvements.

### Junior Front-End Developer

**Online IT Solutions | December 2018 – July 2020**

- Transforming design mock-ups into interactive web applications using HTML, CSS, and JavaScript, with a focus on modular, scalable, and maintainable code.
- Utilizing Sass/SCSS to streamline CSS preprocessing, improving code organization and efficiency.
- Collaborating closely with senior developers and designers to support projects throughout all stages of development, from concept to deployment.

- Building responsive websites and web applications that deliver an optimal user experience across various devices and browsers.
- Creating and maintaining documentation for code and development processes to ensure consistency and facilitate knowledge sharing within the team.
- Troubleshooting and debugging issues to optimize performance and resolve technical problems efficiently.

## PROJECTS

---

**Blog Admin Panel** <https://github.com/Mark-Alexis-Posadas/blog-admin-panel>

**Technologies Used:** React.js, Tailwind CSS, React Hooks, localStorage, MySQL2, Node.js, Express.js, TypeScript, Redux Toolkit Query, React Router, Formik, and Yup.

- Developed a comprehensive Blog Admin Panel with full CRUD functionality (Create, Read, Update, Delete) for managing blog posts.
- Utilized React.js, React Hooks, and Tailwind CSS to build a responsive and interactive user interface, ensuring state management via localStorage for persistent data storage.
- Added key features, including:
  - Authentication system for secure access, allowing user login and registration.
  - View, edit, and delete blog posts with real-time updates using Redux Toolkit Query.
  - Form validation using Formik and Yup to enhance data integrity and user experience.
  - Dynamic routing with React Router to navigate between different sections seamlessly.
  - Integrated MySQL2, Node.js, and Express.js for efficient backend development and API integration.
  - Styled the application with Tailwind CSS for a clean and modern design.
  - Implemented robust authentication and authorization to enhance security.

**To-Do List Application** <https://github.com/Mark-Alexis-Posadas/todo-list-app>

**Technologies Used:** React.js, TypeScript, React Hooks, Tailwind CSS, localStorage, FontAwesome

- Developed a dynamic To-Do List application with full CRUD functionality (Create, Read, Update, Delete) for managing tasks and employee details.
- Utilized React.js and React Hooks for building a responsive and interactive user interface, ensuring state management via localStorage for persistent data storage.
- Added key features, including:
  - Preventing duplication of tasks by checking if the task already exists before adding.
  - Enabling users to clear a single todo or clear all todos with one click.
  - Implementing a delete confirmation modal to prevent accidental deletion of tasks.
  - Allowing users to view both previous and current task updates, ensuring a seamless experience.
- Styled the application using Tailwind CSS, ensuring a clean and modern design.
- Integrated FontAwesome icons for a visually appealing interface and enhanced UX.

## EDUCATION

---

**Pangasinan State University**

**Lingayen, Pangasinan**

Bachelor of Information and Communication Technology, *2012 - 2017*
