EXPERIENCE

Freelance Front-End Developer / Consultant **2023 - Present**

- **Architected** responsive web applications using **React.js** and **Tailwind CSS**, implementing **modular design systems** to improve maintainability.
- Streamlined data fetching by integrating **RESTful APIs with Axios**, leveraging **custom hooks and state management (Zustand/RTK)** for a reliable UI.
- **Refactored legacy codebases** into **reusable component libraries**, reducing development time for new features by focusing on **DRY principles**.

Front-End Developer | Ipsum Philippines, Quezon City **June 2021 – January 2023**

- Developed **high-traffic internal dashboards** for attendance and data management, focusing on complex state handling and **real-time data visualization.**
- Scaled e-commerce operations by developing custom themes and functionality for **WordPress** and **BigCommerce**, resulting in improved **page load** speeds and **SEO rankings**.
- Collaborated with design teams to translate high-fidelity **Figma prototypes** into pixel perfect, accessible React components.

Front-End Developer | Online IT Solutions, Quezon City **December 2018 – July 2020**

- Transformed complex **PSD layouts** into semantic, **responsive HTML5** and **SCSS**, ensuring strict adherence to design specifications and modern web standards.
- Contributed to **large-scale booking platforms**, ensuring seamless user flows for flight and hotel reservations.
- Implemented **client-side form validation** using **jQuery** and **JavaScript**.
